

HISTORY

2014

International Paint

Fresko started its operations by signing a distributorship agreement with International Paint, an AkzoNobel company, for the sale and distribution of protective coatings in Turkey.

2015

Graco

While still in its first year, Fresko, as a distributor of International Paints, managed to become Turkey's top selling distributor in the protective coatings group.

In addition, Fresko has signed an Authorized Turkey Distributorship agreement with Graco in order to sell airless paint sprayer pumps and spare parts for these pumps and to perform technical service.

Fresko has strengthened its position in the protective coating sector by adding International Paint's marine coatings and Graco's vapor abrasive blast equipments to its product range.

2016

EcoQuip ATEX

For the second time, Fresko has succeeded in becoming the best selling distributor of International Paint in the protective coatings group in Turkey.

2017

Commitment

Combining the coating experience gained with International Paint with the airless spray experience gained with Graco, Fresko started to provide special coating services, including mechanical and construction works, to its customers, especially in specific projects that require knowledge and strong equipment range.

HISTORY

2018

Equipment Rental

It was the year that the foundations of Fresko's rental equipment investment strategy were laid.

Fresko has acquired many equipments from Atlas Copco's mobile diesel compressors to Blastrac's unmanned blast equipments, from Gracos's ATEX certificated vapor abrasive blast equipments to high pressure airless sprayers, to rent it out to its application customers.

2021

Layher

Fresko has become the authorized solution partner in the rental business of LAYHER brand scaffolds, which is the leader in its field in Turkey as well as all over the world.

As with other equipment, FRESKO has started to provide rental services in industrial scaffoldings, which are needed in a wide area from the inside of chimneys and industrial tanks to the pipelines above sea.

2022

Elcometer

It has increased its strength in the field of protective coatings by signing distributorship with the Elcometer brand and starting to sell measuring devices and sandblasting equipment.

2022

Projects Abroad

Continuously expanding its product range since 2014, FRESKO's goal this year is to successfully manage to provide high quality, competitive, fast and customer-oriented service to all its customers, including international projects, without sacrificing safety.
